

PKCC 2023 Membership and Park Rules Addendum

2023 Dock/Ramp Limitations

To preserve the dock/ramp's integrity until the replacement is completed, the following rules will be in place. These rules were enacted on the recommendation of PKCC's consulting structural engineer:

1. Until the ramp is replaced, you may **NOT** unload your boat by going over the lip and off the end of the ramp.
2. You must drive your boat off the trailer while the trailer remains fully on the ramp.
3. Do **NOT** tie your boat to the end posts and use the posts to stop the momentum of your boat. The front of the dock is separating, and the front dock footers cannot bear the weight of the bigger, heavier boats being offloaded.
4. Power loading boats has caused significant undermining of the boat ramp. To put your boat back on its trailer you must use your winch. Power off/onloading is prohibited.
5. Use of the dock/ramp will be limited to boats no longer than 28' until the new dock/ramp is built.
6. If your boat is too large to comply with above rules, then you must utilize another ramp such as Founders or Harry Harris Parks.

I have read and understand the above rules pertaining to the use of the dock/ramp. I fully accept/assume all risks associated with the use of the dock/ramp. I agree to release PKCC and its officers/board from all liability, claims, or damages associated with its use.
